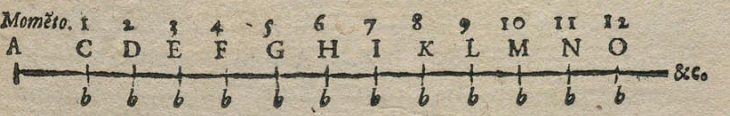
DE DEFINITIONIBVS.

CAP. I.

Definitio 1.

LINEA æqualiter creſcere dicitur, quum punctus eam deſcribens, æqualibus momentis per æqualia interualla progreditur.



Sit punctus A, à quo ducenda ſit linea fluxu alterius puncti, qui ſit B. fluat ergo primo momento B ab A in C. Secundo momento à C in D. Tertio momento à D in E. atque ita deinceps in infinitum deſcribendo lineam A C D E F, &c.
